

ABSTRACT OF THE DISCLOSURE

5 A method and system for automatically providing responses to a
recipient stores data relating to the recipient in a data store
(10), the data being gatherable from one, some or all of written
communications (32), mail (34), telephone (38), the Internet (12,
14 16), servers (18, 20), telephone voice, data and text messages
10 (24, 28, 22), and other files and data sources (30). The
automatically generated communication can be provided on one, all
or some of the Internet (44, 16', 12'), Servers (18, 46), the
telephone system (48, 22', 50) in the form of text, voice and
data messages, and as mail (52, 54) for posting or mailing. The
15 composed communication can be in a selectable language and
jurisdiction, determinable by the address of the recipient, and
can be in an idiom, determined from the stored data concerning
the recipient.
